

Abstract. To better understand the philosophy of Averroes, it is mandatory to consider some key notions of the Arabic language, since every particular way of thinking is always determined by its language and its specific grammar. Our Hispano-arabic Muslim philosopher and theologian have left an indelible mark due to his peculiar way of conceiving man, the world, and God. We will comment on the hermeneutical behavior conducted by Averroes' analysis. Finally, we will assess the value which he gave to the notion of 'power'.
